Judgment: Within normal limits

Subjective Information

Individual's report of progress towards goals/objectives since last session:
Staff Referral

Goals, Objectives, and Interventions Addressed Today

Interventions/Methods Provided:

Staff Referral: (Received 2/10/2024) "Richardson was the victim of a battery that resulted in several puncture wounds to torso and arm. Richardson was interviewed and was upset over event"

Response to Interventions/Progress Toward Goals and Objectives:

Met with pt in MPB MH office for Staff Referral. Reviewed and signed an updated LOC form. Explained to pt the reason for visit. Pt shared that the situation has caused "a flare up in my PTSD" but denied any further needs at this time. Pt denied fear for safety. Pt reports managing adequately in the dorm. Denied any further needs at this time. No significant concerns were observed during session. Denied SI/HI/SIB. Advised to submit HCR as needed.

Current Assessment

Assessment:

The patient is cooperative and communicative.

Risk Assessment

CURRENT ENCOUNTER

Risk Assessments

Patient denies suicidal ideation, plan, intent, and/or attempt.

Patient denies property damage ideation, plan, intent, and/or attempt.

Patient denies homicidal ideation, plan, intent, and/or attempt.

RISK ASSESSMENT HISTORY

Risk	Current	Past	Documented	Event Date	Approximate Date	Ideation	Plan	Intent	Scale
Suicide	Denies		02/14/2024	02/14/2024	No				
Property	Denies		02/14/2024	02/14/2024	No				
Homicide	Denies		02/14/2024	02/14/2024	No				

Attempt	Planned/ Impulsive	Drug/Alcohol Influenced	Medically Treated	Plan Attempt Description

SAFETY MANAGEMENT PLAN

Patient Name: RICHARDSON, JONATHAN C
ID: 127630 Date of Birth: [REDACTED]

Identified Goals

Mental Health

Comply with Treatment Plan
Maintain mental health stability

Goal Measurement

Goals previously set

Maintain mental health stability

Documentation that supports progress or lack thereof towards goals: Attends scheduled appts, utilized HCR as needed. Maintaining stable MH.

Scoring of compliance with mental health goals

Acceptable - has completed 51% or more of assigned goals - 1

I have reviewed this patient's medical record and verify that his/her progress toward identified goals is accurate

VISIT TYPE: Chronic Care Visit

Established patient

History of Present Illness:

1. Asthma

I/I states symptoms occur daily and he uses rescuer inhaler about twice a day. States albuterol/rescue inhaler does provide symptom relief. Exacerbating factors include heat and exercise. I/I denies waking with cough or dyspnea, dyspnea or wheezing at rest, cough, chest pain or heart palpitations. Takes airduo, albuterol inhaler, and montelukast.

2. GENDER DYS

I/I has been taking estradiol and spironolactone regularly. Estrogen levels have increased significantly, however testosterone levels have also increased as well. SHE is appearing more feminine. Is happy with her estrogen levels, but unsure why testosterone went up. States she has been having some abdominal cramping and thinks the medication is causing this side effect.

3. PATIENT EDUCATION PROVIDED

4. Warts

I/I has several warts on left hand that have appeared over the last year. She is asking to have them removed. No open or bleeding lesions. Explained to I/I that this is a cosmetic procedure and would not be done at this time. Will need some additional training on facility equipment and may possibly call I/I down after that.

5. Hand Weakness

I/I had prior injury to right hand in 2005. Had thumb and index finger amputated with contracture to middle finger. Rest of hand is significantly weak. Is asking for medical request for helper in the chow area.

6. Thyroid

I/I was started on levothyroxine a few months back. Most recently TSH was normal at 3.162. She states she is overall feeling much better and has more energy.

PROBLEM LIST:

Problem Description	Onset Date	Chronic	Clinical Status	Notes
Gender identity disorder of adulthood	06/17/2020	N		
Asthma	06/06/2023	N		
Gastroesophageal reflux disease	02/19/2015	Y		Mapped from KBM Chronic Conditions table on 05/09/2016 by the ICD9 to SNOMED Bulk Mapping Utility. The mapped diagnosis code was Esophageal reflux, 530.81, added by Paul A. Talbot, MD, with responsible provider Paul A. Talbot MD. Onset date 02/19/2015.

RICHARDSON, JONATHAN C. 000000127630 [REDACTED] 12/27/2023 07:49 AM 1/5

Borderline personality disorder 05/04/2010 Y

Mapped from KBM Chronic Conditions table on 05/09/2016 by the ICD9 to SNOMED Bulk Mapping Utility. The mapped diagnosis code was Borderline personality disorder, 301.83, added by Darla Hinshaw, MD, with responsible provider . Onset date 05/04/2010; Axis II.

Recurrent major depressive episodes, mild 10/21/2019 N

Problem List (not yet mapped to SNOMED-CT®):

Problem Description	Onset Date	Notes
Asthma	03/19/2007	
Polysubstance Dependence	01/17/2011	
major depression in remission	01/17/2011	
Nonspecific reaction to tuberculin skin test witho	02/01/2011

Abdomen	Normal	No abdominal tenderness. No hepatic enlargement.
Musculoskeletal	Comments	right thumb and index finger amputation, significant hand weakness
Neurological	Normal	Memory - Normal.
Psychiatric	Normal	Orientation - Oriented to time, place, person & situation. Appropriate mood and affect.

Suicide Risk Screening**Assessment/Plan**

#	Detail Type	Description
1.	Assessment	Asthma (493).
	Impression	Fair control. Educated I/I on proper use of inhalers as she had not been using them correctly. Educated I/I on avoiding exacerbating factors and limiting use of inhaler to only as needed. Notify healthcare staff if using inhaler more than 2 times per day consistently. Return for CCC in 180 days..
	Patient Plan	Patient expressed understanding of diagnosis, disease process, and plan of care. Risk and benefits of treatment were discussed. Disease specific education provided. Signs and symptoms that would need urgent evaluation were discussed with patient.
2.	Assessment	Gender identity disorder in adults (302.85).
	Impression	Continue estradiol and sprinolactone. Repeat estrogen and testosterone levels in 90 days. Add CMP, CBC, and TSH to those labs as well. Abdominal cramping likely not caused by medication. Discussed with I/I that if it continues can work up for other issues causing the pain. CCC 180 days.
	Patient Plan	Patient expressed understanding of diagnosis, disease process, and plan of care. Risk and benefits of treatment were discussed. Disease specific education provided. Signs and symptoms that would need urgent evaluation were discussed with patient.

3.	Assessment Impression	Warts (078.10). As this is a cosmetic concern will not remove at this time. Will follow-up at next CCC and if areas continue to worsen will consider removal at that time.
	Patient Plan	Patient expressed understanding of diagnosis, disease process, and plan of care. Disease specific education provided.
4.	Assessment Impression	Hypothyroidism (244.9). Will check TSH in 90 days with other labs. Continue levothyroxine. CCC 180 days..
	Patient Plan	Patient expressed understanding of diagnosis, disease process, and plan of care. Risk and benefits of treatment were discussed. Disease specific education provided. Signs and symptoms that would need urgent evaluation were discussed with patient.
5.	Assessment Impression	Hand weakness (729.89). Will give pass for helper in chow hall..
